

# Heating, Ventilation, Air Conditioning and Refrigeration - Level 1

Are you an aspiring Stationary Engineer who wants to start a great career?

Are you an experienced Stationary Engineer who wants to take your career to new heights?

***The IUOE has the program for you.***

**Heating, Ventilation, Air Conditioning, and Refrigeration – Level 1** is the first part of a comprehensive apprenticeship program that includes both classroom and on-the-job training. With a focus on how systems work, the course provides critical foundational knowledge, preparing learners for the skills-based portions of the program.

This course is a **Blended Learning** experience: instructors can choose to present it entirely in **face-to-face training**, or allow students to utilize the online environment to prepare for class ahead of time.

## ***Course features:***

- ✓ **Comprehensive** -- 75 hours of classroom training, plus labs and on-the-job experience. Covers why and how things work, and introduces what to do to keep them working.
- ✓ **Engaging** -- Movies, animations, and interactive exercises keep you interested. You get to actively participate in the learning experience.
- ✓ **Effective** -- Learning isn't just about memorizing. It's about changing what you think and how you do things. Built-in activities and quizzes throughout the course ensure that real learning is taking place.

**Developed by a team of experienced Stationary Engineers from across the Union, along with a team of experts in learning and development, this course provides all the tools you need to kick your career into high gear.**
